Summary Statement

My Name is Mark Adebayo Ajala, I grew up in the city of Abuja, F.C.T (Federal Capital Territory) which is the capital of Nigeria. Throughout my life I travelled lot, as my father was a diplomat. I have so far lived in Russia, Germany and China, each for the span of about 3 years. I have a deep love for sports, and excel in a variety of it. I mostly tend to play football and sometimes basketball. Ever since I was a child, I've always been glued to my computer, and have had a fondness for things pertaining to technology. I always played a plethora of games, and sometimes wished to make games of my own at the time. Recently, I have developed a liking for web development, but I still intend to dabble in some game development in the future.
